EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Guy McClung on August 15, 2005.

The application has been amended as follows:

In the claims:

Claims 36-37 have been cancelled.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The prior art teaches that it is well known to sew at least two screen members together in a vibratory separator. The features, however, of a pattern of expandable material on and corresponding to the stitch pattern, the thread passing through the holes in the pattern of expandable material and the expandable material expanded within the holes following extraction of a needle therefrom render the invention novel and non-obvious over the prior art. The closest prior art, Shirai, teaches the injection of expandable material *after* the sewing of a filter cloth (See English Abstract).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
